PROFESSIONAL SUMMARY

Full Stack Developer with 3+ years of experience building production web applications and 50+ delivered web projects. Currently building a premium domain marketplace with Next.js, React, TypeScript and PostgreSQL/Prisma, and engineering custom payment and LMS systems, including a Fiserv Commerce Hub integration with HMAC-SHA256 request signing. Strong in modular frontend architecture, REST API development, third-party and payment integrations, and shipping client-facing products end to end. Pursuing a BS in Computer Engineering.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, PHP, SQL, HTML5, CSS3
Frontend: React, Next.js (App Router), Redux Toolkit, Zustand, Tailwind CSS, Responsive UI, Component-Based Architecture
Backend: Node.js, NestJS, Next.js API Routes, RESTful APIs, Zod Validation, Authentication Flows
Databases & ORM: PostgreSQL, MySQL, Prisma ORM
Payments & Integrations: Fiserv Commerce Hub, CardPointe, WooCommerce Payment Gateways, HMAC-SHA256 Signing, Third-Party APIs
Tools & Practices: Git, GitHub, Code Review, Postman, Vercel, Figma, Modular/Feature-Based Architecture, Debugging
CMS & E-commerce: WordPress (Custom Plugins & Themes), WooCommerce, Shopify (Liquid), ACF, LearnDash, Elementor

PROFESSIONAL EXPERIENCE

Full Stack & CMS Developer — BetaGen Technologies, Karachi **Jul 2026 – Present**

- Build a premium domain marketplace (discover, buy, lease and manage domains) using Next.js 14 App Router, React, TypeScript, Tailwind CSS, Redux Toolkit and Zustand.
- Restructured the production frontend from a flat file structure into a modular monolith with 8 feature modules (Domains, Auth, Orders, Payments, Leasing, Inquiries, Notifications, Settings) and a centralized typed data-access layer, decoupling UI from the backend.
- Develop server-side features with Next.js API Routes and NestJS, including Zod request validation, third-party API integration and PostgreSQL data access through Prisma.
- Engineered a custom payment plugin on the Fiserv Commerce Hub API with HMAC-SHA256 signed requests, a transactions admin dashboard, a freemium Pro/Free paywall and security hardening.
- Built SC Portal, a custom LMS/CRM plugin for course delivery and student management, and authored technical documentation enabling the non-technical client to manage course content independently.
- Integrate and debug third-party payment systems (CardPointe/Fiserv, WooCommerce gateways) and customize Shopify (Liquid) and WooCommerce functionality for client projects.
- Collaborate with the CTO on technical decisions; follow Git branching, pull-request code review and controlled merge workflows.

Web Developer — Freelance (Remote) **Jan 2025 – Jun 2026**

- Delivered 15+ client websites end to end: requirements, Figma-to-code implementation, deployment, hosting, domains/DNS and post-launch maintenance.
- Built custom WordPress plugins, themes and shortcodes in PHP and MySQL, extending CMS functionality with custom post types, ACF and WooCommerce.
- Implemented and troubleshot payment gateway integrations for e-commerce clients, resolving checkout and third-party gateway issues.

Associate CMS Developer — Geeks of Kolachi, Karachi **Oct 2024 – Dec 2024**

- Contributed to 10+ client projects, delivering custom functionality, payment integrations and third-party tool integrations.
- Built reusable custom shortcodes and converted Figma designs into responsive, production-ready websites.
- Maintained and debugged live sites while coordinating requirements and revisions directly with clients.

WordPress Developer — Avancera Solutions, Karachi **Jul 2023 – Sep 2024**

- Built responsive websites from scratch with HTML, CSS, JavaScript and WordPress alongside senior developers.
- Diagnosed and fixed real-world production bugs; recognized as Employee of the Month.

PROJECTS

- **Tabarukat E Masomeen — Shopify E-commerce** | Shopify, Liquid, JavaScript, HTML, CSS — Built a large-catalog storefront with 1,020+ products and reusable custom sections, letting the client manage content without code changes. Live

EDUCATION

BS Computer Engineering — Sir Syed University of Engineering & Technology (SSUET) **2024 – 2028 (Expected)**
Relevant Coursework: Data Structures & Algorithms

CERTIFICATIONS

- The Complete JavaScript Course — Udemy (2026) | Web & Mobile App Development — Jawan Pakistan & UIT (2022 – 2023)
